

Key Stage 2 Results 2016/17

All students with attendance of 85%+ (16/17) made progress across all core subject areas. The large majority of students achieved their target, with 5/17 managing to exceed targets set.

The only student who did not make any progress was given a new ASC diagnosis, accompanied by borderline severe learning difficulties. An early EHCP review was held in Dec 16; professionals were in agreement that a new placement should be identified to support his individual needs.
