

Task: To write an argumentative speech about young peoples' use of technology

Good Morning/ Afternoon

My name is Luke B. and I am going to talk about young people's use of Technology. It's my belief that young people are spending too much time on technology.

My first point is when they're on their phone etc. they are not finding social interaction and are not spending time with their mum, dad, and family members.

My second point is when they're on social media and posting stuff like videos and photos, there are people who say not so kind things, which is cyber bullying.

My third point is a positive, there's a thing in games called game chat. They can speak to others and that's good for their social life.

My last point is that young people stay up all night playing with friends etc. And when they don't get enough sleep this can effect mental health and work at school.

In conclusion I hope you can go on board with what I have said.

Thank you for listening.

Luke B, yr 7
